

Designer Series StarFrame Rack Weight Capacity

Designer Series StarFrame Rack
19" wide x 48RU high x 30" deep
59 pounds empty

TOTAL WEIGHT - **2,819 pounds**

An aluminum Designer Series StarFrame rack system fully loaded with 24 of our Adjustable Shelves - each loaded shelf weighing 115 pounds.

That's 2,760 pounds! *

The Designer Series StarFrame Rack is the industry standard 19"wide, 30" deep, 48RU (rack units) high and weighs in at 59 pounds empty.

If it were possible to physically fit more shelves into this Rack...our Modular Designer Series Rack System would suport the additional weight!

SINGLE SHELF DETAIL

Our fully loaded 1RU, 150 pound capacity, adjustable shelf (15 pounds), which when loaded with 70 of our Zinc Cast Corner Connectors (60 pounds) and 70 bags of dogpoint rack screws (40 pounds) totals 115 pounds. Generally equivalent 1RU rackmount components weigh less than what's in the detailed photo above.

* Note: Rack weight capacity is based on static load, evenly distributed weight and equipment mounting to front and rear rack rails for optimal support. Please consider variations in weight distribution, rack positioning and rear rail support for best possible results when loading various rack mount equipment. Whenever rack equipment must travel or be transported, shock protected and arrive safely to its destination please consider Star Case reusable shipping cases (<http://www.starcase.com>).
