

79,507 SIZES! Yes, In Stock! ...and NO, We're NOT Kidding!

If you've been shopping for a rack to house your rack mountable equipment, your search is over... unless, you really enjoy shopping! A new Rack design enables you to put together any custom sized rack using only 3 STOCK parts. Get the exact size when you need it.

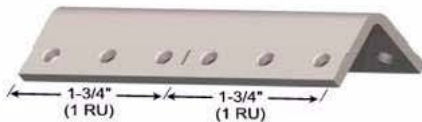

How's It Possible to Stock All These Sizes?

*It's all in the design!
There are Only
3 Essential Parts*

Patented

This Patented, specially engineered, high strength zinc alloy metal Corner creates an effortless, inexpensive, and easy to assemble modular Rack.

The specially designed Rail with 10-32 tapped holes running the entire length of both legs attaches to the Connecting Corner with Dog Point screws.

NO, it's Not A Pet! It's a Dog Point Screw

An out of the ordinary screw with a cone shaped head, tightened into a matching countersunk hole, results in a precise fit that will not budge. The first few starter threads are eliminated at the end of every Dog Point screw and this results in quicker docking, with the corresponding holes in the rack rail, for lightning fast assembly.

But, does it Wiggle?

3 precisely engineered parts when connected together form Wiggle-Free equivalent strength and integrity of fully assembled welded rack enclosures.

The "CUBE" - 19" rack mount width, depth & height, with front, rear, left, right, top & bottom access to 576 tapped 10-32 holes for racking 19" width rack mountable equipment.

The Exact Size you need!

Choose any width, depth, & height of rack rail in any of (43) 1-3/4" increments. Inscribed every 1-3/4" are etched marks, separating industry standard hole spacing, to help facilitate accurate alignment of components. If you need a larger or smaller size later, it's simple and inexpensive to expand or reduce the size of your existing Rack.

Is Space A Problem?

It's adaptable, compact and space-efficient. It's lightweight and maneuverable, and it's just what you need to solve your daily, as well as, unique and unusual storage space limitations. They Stack, Connect & Transform into the only Equipment Racks you'll ever need. Besides being actually FUN, EASY & FAST to put together, you can literally build all kinds of neat stuff.

Inexpensive to Ship!

Every Rack assembly ships knocked-down in only 3 small cartons.

Build All Kinds of Neat Stuff!

15 RU (rack unit)
Rack with optional wheels, drawers, keyboard shelf, pvc side panels and steel top cover creates a lightweight, versatile and portable rack.

Extras & Options!

Additional options include wheels, braces, handles, shelves, drawers, and more.

- **organize effectively**
- **store safely**
- **work efficiently**
- **spend prudently**
